

QUALITY POLICY STATEMENT

It is the policy of Rhodes Engineering and Design Limited to apply current best practice in professional engineering. To achieve this we operate under a comprehensive quality management system. This quality system covers all engineering activities conducted by Rhodes Engineering and Design Limited and conforms to ISO/IEC 17020:2012 for the following accredited activities (inspections):

- Design Verification of Pressure Vessels
- Design Verification of Pressure Piping

We are committed to quality, and continuous improvement of our systems. This is accomplished by:

- Ensuring all staff are familiar with and understand the requirements of the quality system
- Conducting regular quality audits and management reviews
- Clearly defining Client requirements, deliverables required for each project and reviewing the successfulness of these at the end of the project
- Maintaining a register of staff competencies and skills, and ensuring staff are competent to perform assigned tasks
- Planning staff training and development
- Regularly reviewing the above objectives, at least every 12 months
